

# THE GLEICHEN HALL

VOLUME XXXI, NO. 13

GLEICHEN, ALBERTA, WEDNESDAY

JUNE 15, 1938

SUBSCRIPTION \$2.00 PER YEAR

## TOWN COUNCIL GRADUALLY SELLING LOTS

According to the minutes of the last town council meeting a large amount of business was transacted. Councillor W. E. Thompson reported that he had interviewed Mr. Bogstie in connection with the nuisance ground with a view to having it cleaned up, the charge for doing the work it was understood would be applied to taxes. Mr. Bogstie stated he would look it over and see what he could do the work for.

A letter had been received from the Board of Trade directing attention to the dangerous condition of the sign at the old Gleichen Hotel. The secretary was instructed to write Mr. Hunter, present owner of the building, and bring the matter to his attention.

A letter had been received in which it was stated there was a possibility of getting the front part of the Lumby & Bert Garage. The prospective tenants would require that the first month be paid in advance, the building into shape for occupation. As the town had not yet obtained control of the building the lease would have to be paid to the owner. It was applied to the taxes now outstanding against the property.

The letter had been received from the James estate regarding the property formerly used for a pool room, and which had been closed for a number of years. The letter asked that the council consider, recommendation for the granting of a license for a pool room on the property, so that it could be made revenue producing. The council had no objections to a license being granted for the pool room.

Adj. A. H. Hill of the Alberta Army, waited on the council an asked that the council consider a grant to assist in the renovation work being done by the Salvation Army. M. Hill explained at length the work which is being done along these lines and the council made a grant of \$25 to this work.

A man waited on the council an asked that his relief allowance be increased, stating that he was willing to work out his relief to the extent of 40 hours a month. He was advised that the committee had reviewed the case and had recommended that an increase to bring his allowance up to \$15 a month for food had been made. This would be presented to the council for approval. This man stated the matter was left in abeyance pending the application.

Mrs. M. M. Tucker was desirous of purchasing lots 14 and 15 in block E near her home providing there could be purchased reasonably. At these lots have not been producing any revenue for a long time, and were of practically no value as they were it was suggested they be sold. The council decided to sell at \$5 per lot and that the balance of arrears be cancelled of the roll.

R. K. Hunter made application to either rent or purchase lot 12 in block 7. This lot was formerly used by the Gleichen Motors and had a good cement floor. The meeting decided to sell for \$25 cash and the rent of the taxes, or in the event of it being rented that the rent be \$15 for the year 1938.

The secretary submitted a list of properties that were up for sale under the tax recovery act this year. It was stated that the tax sale be held on Friday September 30th, 1938, at the town office, and will start at 1.30 in the afternoon. The up to date of the assessed value and the terms of the sale.

The auditor's quarterly statement for the quarter ending March 31st was reviewed and accepted. The building on lot 29 block 3 had been sold and removed. The building had been taken down and moved on to town. The total taxes on the improvements amounted to \$47 and it was felt that in view of the improvements being removed that a reduction be made in the amount of improvement tax.

Councillor Menard was re-appointed deputy mayor for the ensuing three months May 21st to August 21st.

**ST. ANDREW'S CHURCH**

Children's Church and Holy Communion 11 a.m.

## News Items of Local Interest

Miss Peggy Yates spent a week in Calgary visiting friends.

Owing to the rain the sports day billed for last Thursday was postponed until today.

J. O. Bozette is having his house painted. Numerous other people have been busy giving the interiors of their homes a coat of paint.

A Rockyford girls softball team paid a visit to Gleichen Sunday and defeated the local girls club by a very one sided score.

D. Hutchison of Three Hills, who at one time was manager of the Royal Bank here, was a visitor to town Saturday.

Meadowbrook and Gleichen softball teams battled Sunday on the local diamond. The game resulted in a win for Gleichen by a score of 7-5.

Ed Krause paid Wetsakwin a visit last week. He took a truck load of stock with him, returning brought back a load of lumber to Turner Valley.

The ladies of St. Victor's Church held a most successful tea and sale of home cooking Saturday afternoon. There was an exceptionally large turnout of visitors.

Gerald Phillips, Max Yates and Peter Downey spent a couple of days in Banff last week. They had a good time but the tourist season being a little slow.

## FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

J. Peterson has been visiting his friends in town. He has been in a section of land near Coroner's.

Mrs. White entertained the ladies on a sewing party last Thursday.

The very hot weather during the past week had great effect, and the crops are looking fine.

By mistake the little two year old boy of Mr. and Mrs. Joseph Leifson drank some oil on Friday night.

Some brought to Gleichen where the Paragonium attended him. Later the boy was taken to Calgary where he died Sunday night. The boy was very angry, turning his face which he had wiped it from his mouth, and as he got some of it in his lungs they were in very bad condition.

R. Com left Thursday for Pincher Creek to accept a similar position to the one held with J. A. Jamieson for over two years.

The fuel controller of Canada is advising the people to get in their winter's supply of coal now.

Mr. and Mrs. L. Michael are happy over the arrival of a fine baby girl on Monday afternoon, June 13th.

The Blackfoot Indians are enjoying their annual Sun Dance and the white folks are doing the usual maneuvering to catch them at it.

Quite a number of farmers are saving no chances and have started to irrigate. Others claim that it is a sure sign of rain in abundance about the time the irrigators complete their work.

Owners of dogs running around town raiding chicken coops are advised to watch out. We know of more than one case where hunters are advised all ready for action.

Perrard Bros. formerly of Antler, Saskatchewan, have recently started operations on their farm, eight miles north of town, and during the past three weeks have made great progress in the way of improvements. Both men are enthusiastic in their praise of the Gleichen district and when they bought their land made the action after a careful investigation.

## THE PLANTING CAR GIVES ADVICE ON SHELTER BELTS

Reducing loss of moisture from evaporation, damage from soil drifting, conservation of natural trees and planting shelter belts; beautifying the farm home and grounds are some of the reasons why the Forestry Association's "Planting Tree" plan. This railway car equipped

little early girls were as much as a hen's teeth.

The Gleichen Boys Band played on the street Saturday evening for the second time since they organized some time ago. They were under the leadership of Bandmaster Hilt-Oley was also on the job and came in very handy in helping the band get started and keeping time to the music.

Some splendid showers paid the district a visit last Thursday and was the cause of much jubilation. In the afternoon about three o'clock, some hail fell north of town but being of the soft variety did not cause any damage to the crops. Needless to say the rain put a stop to the sports planned for that day. However, the dance was put on and was very well attended.

Last Wednesday morning Bob McArthur arrived to visit relatives and friends. He was on his way home from a business conference in Washington, D.C.

Eleven members of Alberta Star and Herald visited St. Andrew's church on a night last week, when that Chapter celebrated their 10th anniversary.

One of the show places in town is the garden of Mr. and Mrs. J. E. Wilson. They appreciate the garden and visit it and see for yourself. And speaking of gardens in general it is apparent that each gardener is going off on a system of his own and the result is the town can boast of gardens of many varieties. Most people take great pride in their gardens and it affords them much pleasure to show the visitor over the place.

Tom Wilson, who farms and runs a gasoline station four miles north of town, is a little more up to date than most people in the district. Thursday Mr. Wilson stated that he had received an electrical wire fence which he hoped to set up the next day. This fence has only one strand of wire and any animal coming in contact with it receives a shock and retreats from the vicinity. A hurry treat from the vicinity.

Evidently the news of this electrical fence reached Vancouver in no time at all, because on Saturday evening when "Did You Hear," came on the air he told all about it but failed to give the first man to install the fence in this district.

With motion pictures and lantern slide machines, is touring the prairie provinces for the thirteenth year. This year the car is being financed by the member line elevator companies of the North-West Grain Dealers Association. Local line elevator agents are sponsors of the car when it makes a stop. The car was donated to the Canadian Forestry Association by the Canadian Pacific Railway and both railways move it from town to town free of charge.

According to A. R. Beaven of the car, who is travelling with the car for his twelfth year, there is greater interest and enthusiasm shown by rural people than ever before. The car has been out since March. At the end of May 48 towns had been visited, 128 meetings held and a total attendance of 17,052 people.

Every afternoon a special program is shown for the school children, and the training for adults. The program is made up of short educational talking movies, with a couple of short comedies.

Beaven's program includes many of the same pictures shown in the afternoon, but more time is spent on the subject of home and farm life. The evening program includes many of the same pictures shown in the afternoon, but more time is spent on the subject of home and farm life.

It is naturally impossible for the car to visit all prairie towns in one season. However all those interested may obtain advice from any line elevator agent concerning the car.

## FARM WOMEN MEET AT HOME OF THEIR PRESIDENT

The U. P. W. A. held their regular bi-weekly meeting at the home of their president, Mrs. A. Buckley, last Wednesday. The opening song was "Old Oaken Bucket." The members responded to roll call by giving a "Verse of my Husband."

The advantage of sending delegates to the "Farm Women's Best Week" at Olds was discussed, but action was deferred until next meeting.

A bulletin on legislation was read by Mrs. A. Buckley, and Mrs. Quinn sang two solos which were very much appreciated.

After the business session, Mrs. Stott supervised an architectural contest which afforded much pleasure. The delicious lunch was served by Mrs. A. F. Wilson and Miss Goodman.

The next meeting will be held June 23rd at Mrs. J. H. Sammons' home. Mrs. Stott as programmed.

## THE WORLD OF WHEAT

By H. G. L. Strang, Director of "Crop Testing Plan"

"Undoubtedly the western producer works under a disadvantage in Canada's fiscal policy. The custom made of other countries, including Canada, played some part in the adoption of policies that led to a shrinkage of wheat imports into the following countries: Switzerland, Italy, Belgium, Holland and in a less degree Germany and France."

These are the significant and important words used by Justice O'Connor in the Royal Grain Inquiry Commission Report just issued.

The Hon. W. D. Roper, minister of the department of trade and commerce, has recently reminded us that "Practically every person in Canada is affected by the trend of Canada's trade. Our problem is to find markets for our surplus production. On our success in doing so depends the livelihood of one half or more of our population."

Not only high tariffs, low markets for our wheat, as Justice Thorpe reports, but in addition they increase the cost of all the things that prairie farmers have for living and production.

The lowering of high tariffs and the removal of other restrictions against international trade would, therefore, considerably benefit our prairie farmers. Such action in addition would bring about increased world prosperity, and would remove a serious cause of war.

"Wars and rumors of wars." This expression is as old as mankind, and is found in all languages. Why do nations fight so much?

The research department of the Seale Grain Company is now conducting a study which seems to show certain inherent human characteristics or defects, are perhaps mainly responsible.

The struggle for existence and the urge to improve living conditions. Which makes countries take possession of other lands that grow more foodstuffs or produce more raw materials.

Selfishness. Which makes countries that have an abundance of good things reluctant to share them freely with other nations.

Envy. Which makes deficient nations determined to fight those countries that have taken possession of lands which produce an abundance of good things.

Is there any remedy for all these sad and distressing struggles? I for one think that perhaps there is. Let the countries which now possess most of the good things of this world make it easier, by lowering their tariffs, for the "have not" countries to obtain their reasonable needs of food and raw materials, all in exchange for their own goods.

This simple remedy I believe would lessen the necessity for war on the part of the "have not" countries, and incidentally, which would also be a decent fair and kindly thing to do.

## "MEN AT WORK!"

The most cheerful sign on the road

★ ★

"MEN AT WORK" is an encouraging, cheerful sign upon the highway.

It is the happiest sign on the business highway too. Business enterprise, making wise use of banking services, is the mainspring of employment.

The contractor responsible for that "Men at Work" sign gets the job of building that stretch of highway by being the lowest responsible tenderer.

Not always does he have the ready money to buy all the materials, pay wages and build it out of his own resources. He goes to the bank and, having a good reputation, he negotiates such advances as he may need.

He orders materials, sets men to work. As the job proceeds, engineers' certificates enable him to deliver and paid for. As he contracted, and the work goes on.

The highway finished, the bank is paid. Such payments enable the bank to supply credit to other responsible borrowers.

A manufacturer gets a large order, with an early time limit for delivery. With only a hundred men, his factory cannot turn out the articles within the time required. With more men he can do it—but he lacks sufficient cash.

Operating his factory, as a going concern, with a profitable order and having a reputation for integrity, he asks the bank to lend him what he needs to pay wages.

The bank makes him a loan. He takes on more men. They get wages. The goods are turned out, delivered and paid for. The manufacturer repays the bank with the agreed interest.

He has his profit and can spend some money developing new business to keep his men employed.

How does a bank make these advances—where does the money come from?

Banks, having branches throughout Canada, mobilize the surplus funds of millions of depositors, large and small, based upon them, make credit available throughout the country which may be required.

Millions of little sums represent the toil, production and lifetime savings of Canadians—your fellow-citizens.

Safeguarding these deposits is the bank's first care.

Deposits of \$1,000 or less—most of them much less—are owned by 3,770,000 out of Canada's 4,084,000 savings depositors. The total of all bank savings deposits in Canada is nearly \$1,584,000,000; the average savings deposit in a bank is only \$387.

Widely safeguarded by Canada's chartered banks these deposits furnish credit that keeps "men at work" when used by Canadian business and industry—producing new realizable wealth from Canada's great resources. The country and all its people benefit.

In the field of business deposits out of an average of 660,000 "current" accounts, \$96,000 amount to \$1,000 or less.

Savings deposits are, primarily, the basis on which banks can lend.

Only the confidence of the people and their willingness to leave their money on deposit, enable a bank to lend money—and at small profit-margin to itself—serve the community.

We have mentioned the contractor and the manufacturer. The same process stimulates employment throughout the whole fabric of production, industry and commerce.

Loans to agriculture and for marketing agricultural products totalled in 1937, \$88,294,000—9.0 per cent of all ordinary bank loans. In Canada the return to the Minister of Finance, October 31, 1937.

If this sum \$57,490,000 went to farmers, cattlemen and fruit raisers and \$30,804,000 to grain dealers, stock merchants and grain exporters.

Other bank loans went to municipalities and school districts; wholesalers, retailers, manufacturers of end dealers in lumber, pulp and other forest products; fishermen, fish packers and curers; public utilities including transportation companies; stockbrokers and bond dealers; provincial governments; mining men; churches, parishes; hospitals; and to charitable and religious institutions.

Canada's chartered banks defend and protect the safety of the funds of depositors—the millions of thrifty souls we have described, whose life-savings they entrust to their banks.

No Canadian depositor, even through the world-shaking events of recent years, has had to fear for the safety of a single dollar lodged with Canada's chartered banks.

The funds of depositors are their own—not a reservoir from which everybody may draw at will for any and every new financial experiment.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk bank business with you. He will be glad to tell you the story from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

## The Curse Of Education

"The best things in life are not given a percentage."

The foregoing is just a small extract from a speech made to a class of graduating Normal School students by Dr. J. S. Thomson, president of the University of Saskatchewan, to give point to a protest which he uttered against the school system of examinations as it exists in Canada and which he appropriately designated "the curse."

It is indeed gratifying to find leaders of education in the Western provinces voicing such a viewpoint on the inelastic method of categorizing school students—of pigeon-holing them under valuations elicited as a result of the application of a rule-of-thumb system of examinations.

As Dr. Thomson said: The grading of A's, B's and C's, and the multiplication of credits until students don't know where they are, "leaves so little place for all the noble things in life that can never be put in terms of percentage."

While the press report of Dr. Thomson's address did not enumerate those noble things towards which the student mind should be guided, it is not difficult to surmise that they can be incorporated in the single-term "good citizenship," provided the definition of that phrase is made to include all that it should designate.

### Good Citizenship

And good citizenship means much more than interest in government, in community affairs, in neighborhood welfare and the like. It involves the development of good sportsmanship, unselfish interest in the welfare of others and the will to recognize and place human values above material considerations and the advancement of moral and spiritual welfare.

It is because these things are, and should be, the ultimate goal of the educational system that the personality and character of the teacher should be the ranking qualification; for, as the teacher is, and not as the teacher says, so will the pupil be during the formative years of the child's career. The teacher is therefore an unconscious and ineliminable mark on the mind of the impressionable youth under his or her care.

The value of the teacher to the children, to the community and the nation should be measured in terms of character and integrity rather than in brilliance of erudition. A teacher of strong individuality and mediocre academic attainments will measure more to the future generation than one who is superlatively clever but lacks the attributes which inspire respect and admiration. The teacher who combines both is a jewel indeed and for such, adequate compensation cannot be measured in dollars and cents.

In the tuition of those things which as Dr. Thomson says, cannot be registered in percentages, an ounce of practice is worth a ton of precept, to paraphrase a time-honored saying. The teacher who renders only lip service to the noble things in life is not the teacher who can give his or her yardstick of real values is applied, but the teacher who is a living example of the aspirations which he or she holds up to the pupils as the lodestar of their careers is a pearl of great price.

While the teacher may have to conform, through regulatory control, to the examination system in greater or less degree, he or she will perform his or her greatest and most valuable work when moulding children into future citizens with ambitions to reach for the highest and best that life has to offer—not in material terms, but in the moral and spiritual realms, and this can only be done by the influence of example.

### A Permanent Influence

The teacher who plays the game of life on the basis of the highest rules will exert an unconscious influence for good on his or her charges that will never be extinguished throughout life, and fortunate indeed is the child whose future destiny is placed in such competent and reliable hands.

Nor will that impelling force die with the passing of the teacher's charges. It will be passed on from the teacher to the student, and the ripple made by the wave by the cast stone or the impulse spreading through the ether from a radio transmitter, no one may say how far it will go or measure the extent of its ultimate effect.

The teachers about to embark on their difficult and highly responsible task of laying the foundation for a new and better nationhood were urged by Dr. Thomson to set before themselves three standards, or, as he called them, "attitudes of life," the absolute worth of the individual human being, the building of character and the value of citizenship, and pointed out the importance of selflessness with the appropriate comment that "the way to be unhappy is to fail in love with yourself."

Excellent advice which, if it falls on receptive ground, is bound to yield rich dividends to the country in the future.

### Yields Another Treasure

#### Paris Wrecking Crews Find More Gold Coins In House

The old house at 53 Rue Mouffetard, Paris, where wrecking crews found a \$800,000 treasure in gold, has yielded another and richer hidden hoard.

Workmen broke down a new section of wall and brought to light a leather and cloth bag packed with ancient gold pieces. Although an estimate of the worth of the new find was not immediately available, officials said it was greater than \$80,000.

The currency found had been buried by Louis Nivelle, King Louis XIV's quarry, to his niece, Anne Louise Claude Nivelle, according to the testamentary document found then.

Hotel Guest: "Is there an Encyclopedia Britannica in the hotel?" Clerk (with polite attention and regret): "There is not, sir, but what is it you wish to know?"

### Not Good Publicity

Successes In Canada Not Strengthened As Much As Failures

"Canada," said Lord Tweedmouth to the visiting Scottish farmers the other day, "gets rotten publicity: too much for the failures and too little for the successes. There is much truth in that remark, states the Ottawa Journal.

Two weeks ago about our Western drought, the problem of our railways, but much less about our solid accomplishments. Perhaps the world does not realize that this small country in half a century has made a nation out of scattered settlements, has started a good start in the development of rich natural resources, is one of the foremost trading countries on earth. Sometimes in the face of immediate difficulties we fail to hear these facts in mind even among ourselves.

The trouble is that our accomplishments go into the blue books, but our difficulties are news, and our successes are not sufficiently understood abroad. Perhaps it is not surprising that it is a fact of first importance that alongside an English-speaking nation of 100 millions we have preserved and developed a British colony, solidly devoted to the British Empire. The progress of agriculture, of industry, of mining and of commerce, as shown in the progress of news, as shown in news, but that progress has been a vital factor in the history of the past half century.

There isn't much we can do in the matter of publicity. We shall just have to carry on in the knowledge that even in the United States many people still believe Canada a place of perpetual ice and snow inhabited mainly by Eskimo and Mounted Police, but we need have no inferiority complex on that account.

### Prime Ministers

Sixteen Ministers And Eleven Premiers In Canada Since Confederation

During the 71 years since Confederation there have been 16 prime ministers and there have been 11 Prime Ministers in Canada. In the 34 years since 1896 there were five Prime Ministers and in the 37 since then only four have been added to the list says "Canada's Weekly."

The most frequent changes in Premiership came after the death of Sir John A. Macdonald in 1891. Between 1891 and 1896 there were five new Prime Ministers—Sir John Abbott, Sir John Thompson, Sir Mackenzie Bowden, Sir Charles Tupper and Sir Wilfrid Laurier.

Sir John Macdonald was leader of the government for about 19 years, the longest period. Sir Wilfrid Laurier, leader for 15 years, had the longest unbroken term. Sir Charles Tupper had the shortest term, only two months and one week. Sir Robert Borden was in office for eight years and 10 months. Mr. Mackenzie King, the present head of the government, has been Prime Minister for about 11 years.

All Mr. Mackenzie's predecessors, except Alexander Mackenzie, were given titles. Sir Charles Tupper was created a baronet. The widow of Sir John Macdonald was created a baroness. Messrs. Arthur Meighen, Sir Robert Borden and H. B. Bennett have remained without titles.

### Checking Aliens

Scotland Yard Searching For Aliens Residing In United Kingdom

The special branch of Scotland Yard, co-operating with the Home Office, has launched a thorough check of aliens residing in the United Kingdom, who are estimated to number around 200,000.

Officers are questioning an average of 50 a day and have found many more who were searching for work in the country last year for the Coronation, renewed their visas last September, and have neglected to renew again.

Immigration officials also are keeping a closer watch for aliens entering at Channel ports.

Two of the eggs were bad, and the hen had taken them back to the nest. "That's all right, mum," said the grocer's boy. "You didn't need to bring them home. Your word is just as good as the eggs."

### Dentists Recommend Wrigley's Gum as an aid to strong, healthy teeth.

Wrigley's Gum is a toothpaste that massages the gums, Alleviates, relieves aching teeth, and helps keep your teeth healthy. Take some home for the children and they will love it.

### Refugees From Austria

Seeking Countries That Promise Toleration And Freedom

With refugees pouring out of Germany and particularly from Austria, the League of Nations refugee office in London is redoubling its efforts to gain entry for them into countries whose institutions promise toleration and freedom.

Australia has just signed an agreement accepting 500 annually and the Canadian government is expected to approach to make at least an equal contribution towards a solution of this problem.

Most of the refugees are Jews, although 20 per cent are Christian Jews. The German Jewish aid committee, on behalf of the Orthodox Jews, has raised a large fund guaranteeing the Australian government that none of the settlers will become public charges for five years. A similar guarantee will be given the Canadian government, it was learned. In Great Britain to-day, regulations will be relaxed to the extent of permitting entry for 500 annually. The British government is helping thousands of refugees without guarantee.

Oxford has awarded two of them major chairs and other universities are eagerly seeking the services of outstanding scholars and scientists among the refugees.

### SELECTED RECIPES

#### LIGHTNING LAYER CAKE (Two Eggs)

3 cups sifted Swans Down Cake  
2 cups sifted sugar  
3 teaspoons Calumet Baking Powder  
1 teaspoon salt  
1 cup sugar  
1 cup softened butter or other shortening  
2 eggs well beaten  
1 cup milk  
Sift flour once, measure, and sift again. Add sugar, salt, and baking powder, sift, and add butter. Combine eggs, milk, and vanilla, and add to flour mixture. Beat vigorously one minute. Bake in two 8-inch layer pans in moderate oven (375 degrees F.) 25 minutes. Spread with jam or frosting between layers and on top of cake.

4 tablespoons butter  
4½ tablespoons strong coffee  
2½ cups sifted confectioners' sugar  
Dash of salt  
1 egg white  
Beat butter to coffee and heat just to boiling. At once pour over sugar, stirring until sugar is dissolved. Add salt and vanilla. Beat until smooth and of right consistency to spread. Makes enough frosting to cover tops of two 8-inch layers, tops and sides of 2 of 8 x 5 x 2-inch cake.

### Her Mistake

An Orchard street resident of Brockville, Ont., politely declined the offer when a small boy and girl knocked at her door offering tulips for sale. She said she had tulips of her own in the garden. But she had no idea the girl was in the garden a few minutes later she found they were gone.

Alphabets of different languages contain the following number of letters: English, 26; French, 23; Spanish, 27; Russian, 41; Latin, 22; Greek, 24; Arabic, 28; Persian, 32; Turkish, 33.

### Made To Order

Research Engineer Explains How Synthetic Moonlight Is Produced

Synthetic moonlight which can be produced in the parlor by the flick of a switch appeared as a great boon for love making.

Aubrey E. Noble of Buffalo, research engineer, has explained it's all done with gas tube lighting. Silvery-blue rays of moonlight are produced by switching off the red end of the color spectrum in synthetic daylight.

Synthetic daylight has been used with success by florists in New York. For housewives who like color in their home the engineers have worked out a plan which combines the use of a mercury lamp with fluorescent crystal paint. The walls are painted with fluorescent crystals and rays from the invisible lamp give a brilliant colored effect.

### To Avoid Collisions

Civil aircraft operators have been warned against jostling over London at night, or in fact flying within 20 miles of Westminster bridge between sunset and 2 a.m. at altitudes between 3,000 and 11,000 feet to avoid collisions during manoeuvres.

A new ordinance map of the county of Surrey, England, with a scale of 20 inches to the mile, shows a building more than 10 feet square.

### Must Serve Seven Years

Before R.C.M.P. Constables Are Given Permission To Marry

Reports from western Canada that some Royal Canadian Mounted Police constables are resigning because of new marriage regulations could not be confirmed at Ottawa, although officers of the force said it is possible some are leaving for that reason.

After Col. S. T. Wood took command of the force last winter the time a constable must serve before he is given permission to marry was increased from five to seven years. The time a constable must serve before he is given permission to marry was increased from five to seven years. The time a constable must serve before he is given permission to marry was increased from five to seven years.

The increase back to seven years was made because it was considered the probability of married men among the constables was too large and it affected mobility of the force. It also increased expenses. When a constable is transferred there is the expense of moving his family. Married men also draw double rations and are allowed additional pay to cover separate living quarters.

Constables who have been four years in the force when the seven-year regulation came into effect will be granted permission to marry within their five years are up, but those who have only one or two years' service will have to wait until they have been in the force seven years.

### Advice From Earl Baldwin

Sees Danger In Britain From Mechanized Reading And Thought

Mechanized amusement, mechanized reading and mechanized thought, says Earl Baldwin, constitute a danger to the future of Britain to-day.

The former prime minister, opening a community hall at Wilton, England, declared: "Our England has always been a country of individuals, of individual thought, of individual work, of individual minds, and I pray God it may always be so."

Modern transport had increased the influence of the town on the country. The same things were in the same newspapers read, in towns and country.

The danger of that, contended Lord Baldwin, "is getting a kind of standardized, suburban, mechanized mind, and it is, in our view as Englishmen, the ingroup use of these media that in many countries has enforced upon the people a regimentation of thought which we believe is a great danger for the future."

Hoping the community hall would be a means of recreation and enlightenment, he warned: "Be your own performers for your own amusement. Be yourselves. Think your own thoughts, act as you will be individual, be independent."

### Her Mistake

An Orchard street resident of Brockville, Ont., politely declined the offer when a small boy and girl knocked at her door offering tulips for sale. She said she had tulips of her own in the garden. But she had no idea the girl was in the garden a few minutes later she found they were gone.

Alphabets of different languages contain the following number of letters: English, 26; French, 23; Spanish, 27; Russian, 41; Latin, 22; Greek, 24; Arabic, 28; Persian, 32; Turkish, 33.

The monarch butterfly takes migratory journeys, and is said to be capable of a 2,000-mile flight.

No matter how low a man may fall, he can still find a dog and a woman to love him—and usually does.

Big Peace Parade

The Hague Saw 10,000 Women March In Silent Demonstration

More than 10,000 Netherlands women from all over the country marched in a peace procession through The Hague, while deputations were received by the Netherlands Government, the municipality of The Hague, and the World Court in the Peace Palace.

This afternoon's peace procession, marching in silence, was a moving expression of women's desire for peace and their general abhorrence of war and violence. It was a reply of Netherlands women to the call issued recently by the Central Committee of the Women's Peace Procession in the Netherlands, addressed to all "peace-loving women."

"Let us all," the call said, "on Goodwill Day, give in public a silent testimony of our unweakened loyalty for peace. Join the ranks of those who know that they are moved by sympathy with the numbers innumerable people who in the past year, in Europe as well as in other parts of the world, fell victims to the force of arms."

Similar women's peace demonstrations were also held in Switzerland, France and Scotland.

### Sealed Against Moisture

Loton Applied To Skin Of New Jersey Sweet Potatoes

Sweet potatoes grown near Swedenboro, New Jersey, are being used in some of the nation's largest stores because of a "meaty texture" they are subjected to before leaving the local shipping centre. After each potato is washed and thoroughly dried, a lotion is applied to the skin to seal the sweet against moisture.

The lotion is a mixture of kerosene, oil and alcohol, which is used after its application and enhances the potato's attractiveness.

### One Honest Firm

The professor had called at nine shops in town for his lost walking-stick and had found it in the tenth. "You know how so much indeed," he beamed, as he took possession of it. "Do you know, this must be one of the few honest places in town? I've called in nine shops already and in each I was told that they hadn't got it."

Farmers in California are being taught by agricultural extension workers how to make simple air cooling equipment for their homes.

In Sequia national park, a chipmunk was declared "champion nut gatherer" after it had stored 88 nuts in its cheeks at one time.

## TODAY

Women simply aren't homely any more. You meet plain women, yes . . . but their smart, trim air is the envy of many who are only beautiful.

In the old days, when a girl gave promise of becoming "hopelessly plain," she was frankly informed of the fact to save her from hurt pride in later years. She remained frumpy and tried to convince herself that she didn't care!

Not today!

Advertising has played a remarkable part in making every woman attractive.

It has taught her to use the beauty and charm that are here heritage, regardless of the shape of her features, her teeth, her hair, her hands, her complexion, her clothes, and even her erect, athletic figure have been "brought out" by methods constantly before her in advertising.

Read the advertisements. They hold secrets of beauty and style that were denied the women of yesterday

### PICTURES CHINESE WAR SCENES TO BE SHOWN HERE

Mr. Arnold Robertson, well known in Canadian peace circles and the son of Sir Hugh Robertson, the noted Scottish musical critic who was until recently adjudging, as musical festivals in Western Canada, will speak at the United Church on Friday June 24th.

He will lecture on the tragic emergency which is facing the victims of the Japanese aggression in China. Spain and other parts of the world, and will link this up with the responsibility of peace-loving Canadians who wish to check the mad plans of the war makers. The speaker illustrates the lecture with vivid and instructive talking, moving pictures from the Orient. The program consists of the feature "China Strikes back" which depicts the development of Chinese resistance in the interior, and the building of the peoples' army. There are also scenes of the bombing of Shanghai. The League has also secured the film "Germany Invades Austria," an authentic news reel of Hitler's seizure of that country which brings out distinctly another phase of the international Fascist attack against world freedom.

This program has been touring Alberta under the auspices of the Alberta council of the Canadian League for Peace and Democracy, and has had the enthusiastic reception of people in all the main centres. Leading churchmen, mayors and other officials have participated. The funds will be used for the maintenance of the League Medical Unit which has been established in China by Dr. Norman Bethune, another Canadian doctor and Nurse Jane Ewen of Vancouver.

### LEGISLATION ACTS TO HARM SMALL MORTGAGE HOLDERS

If the Alberta government's recently enacted mortgage legislation is designed to penalize the so-called "Big Interest"—and most impartial observers are convinced it is—Mr. Aberhart is attempting to use a pile driver to kill a goat. It is authoritatively estimated that only one-third of all mortgages and agreements for sale in the province are held by the corporate lenders so vehemently decry by Social Creditors. There remaining two-thirds is largely in the hands of individual lenders.

The last agricultural census of the Dominion Bureau of Statistics showed that the farm mortgage debt on owner-occupied farms in Alberta amounted to \$107,000,000. A conservative estimate of the probable debt on tenant occupied farms would run to an additional \$11,000,000. These figures make no distinction between agreements for sale and mortgages, but cover both classes of charges.

As accurately as can be ascertained holdings of institutional lenders, computed as at the same date and nearly as possible on the same basis, amounted to \$40,000,000, or about 34 per cent of the total farm mortgage and agreement for sale debt.

If it is fair to assume that these lenders would hold a similar percentage of the urban debt as they do of farm debt, it may be deduced that total urban debt is approximately \$27,000,000. The institutional lenders hold \$9,000,000.

From independent surveys in Saskatchewan, it is stated, it would appear that institutional holdings of farm mortgages are from 25 per cent to 35 per cent of the total debt. The balance is mainly in the hands of individual investors or vendors who had sold under agreement for sale or taken back a mortgage as part of the purchase price.

In short, it is contended, the weight of legislation such as Mr. Aberhart's will be felt most keenly not by the lending institutions but by the individuals who hold two-thirds of the mortgages in the province.

It is being further emphasized in the press and elsewhere that even the one-third of the mortgage debt listed in the portfolios of lending institutions is in reality held by these men and women who have entrusted their savings to the companies for investment. There are more than 100,000 life insurance policyholders in Alberta and many thousands of depositors and debenture holders in trust and loan companies. Not only are these directly affected by the Aberhart legislation, it is pointed out, but those associated with them in other provinces and to some extent even in other countries must share in the consequences.

The newest section of the Boy Scout movement, the Deep Sea Scouts now numbers Scout groups on many ships of the Royal Navy and the Royal Merchant Marine.
